A MAJOR CYBERATTACK HAS OCCURRED. HOW SHOULD YOUR NATION RESPOND?

We frequently hear the terms “Cyber 9/11” and “Digital Pearl Harbor,” but what might policymakers do the day after a crisis? The Cyber 9/12 Student Challenge is an annual cyber policy competition for students across the globe to compete in developing national security policy recommendations tackling a fictional cyber catastrophe. In 2016, the Student Challenge will take place in Washington, DC on March 11-12 and in Geneva, Switzerland, on April 7-8.

THE STUDENT CHALLENGE

In Washington, DC, student teams confront a serious cybersecurity breach of national and international importance. Teams will compose policy recommendations and justify their decision-making process, considering the role and implications for relevant civilian, military, law enforcement, and private sector entities and updating the recommendations as the scenario evolves.

In Geneva, Switzerland, in partnership with the Geneva Centre for Security Policy (GCSP), students respond to a major cyberattack on European networks. Competitors will provide recommendations balancing individual national approaches and a collective crisis management response, considering capabilities, policies, and governance structures of NATO, EU, and individual nations. The competition fosters a culture of cooperation and a better understanding of these organizations and their member states in responding to cyberattacks.

WHAT IS THE CHALLENGE ALL ABOUT?

Now entering its fourth year, the Cyber 9/12 Student Challenge is a one-of-a-kind competition designed to provide students across academic disciplines with a deeper understanding of the policy challenges associated with cyber crisis and conflict. Part interactive learning experience and part competitive scenario exercise, it challenges teams to respond to a realistic, evolving cyberattack and analyze the threat it poses to national, international, and private sector interests.

Students have a unique opportunity to interact with expert mentors and high-level cyber professionals while developing valuable skills in policy analysis and presentation. The competition has already engaged over four hundred students from universities in the United States, United Kingdom, France, Poland, Switzerland, Hungary, Finland, and Estonia.
HOW TO PARTICIPATE

...as a competitor:
Graduate and undergraduate students from any university, including defense colleges and military academies, are invited to apply to compete in teams of four. There are no requirements for team composition based on academic majors, education levels, or nationalities of team members.

...as a coach:
Each team must recruit a coach to assist in preparing for the competition. One coach can serve for several teams. Teams are expected to consult with their coaches to help develop and revise their policy ideas for the competition and confer with them during breaks between competition rounds.

...as a judge:
Experts with significant policy and cybersecurity experience are invited to serve as judges. Judges evaluate the student teams’ oral presentations based on the quality of their policy responses, their decision-making processes, and their presentation skills. Previous judges include practitioners from various sectors, such as government, international organizations, information and communications technology, finance, and the press.

...as an observer:
All competition events are open to the public, and we welcome anyone interested in cybersecurity policy to join us as an observer.

...as a sponsor:
The competition is a unique opportunity for companies to support next-generation cybersecurity education on both sides of the Atlantic and position themselves as innovative thought leaders in the field. Depending on the level of sponsorship, our partners receive great benefits including recruitment of top tech and policy talent; advertisement in print and online; promotional side events; and keynote and judging opportunities.

...as a host:
We offer opportunities to host one- or two-day qualifying and affiliated events. These events are run by students, faculty, or university staff with support from the Atlantic Council.
